

# Gluckhaus

*“House of Fortune”*

## Rules:

- 1) Roll two dice and total the numbers rolled. Find the corresponding space on the game board. If there is no coin on that space, you must place one. If there is already a coin there, you may take that coin.
- 2) A roll of 7 is called the “Wedding”. If a 7 is rolled, you must place a coin, but you can't take a coin from the stack if there is one there already.
- 3) A roll of 2 is called the “Lucky Pig”. Rolling a 2 allows you to take every coin on the board *except* those on the 7 space.
- 4) A roll of 12 is the “King” and allows you to take every coin on the board *including* those on the 7 space.
- 5) What about the 4? Traditionally, there is no 4 on the board and if you roll a 4, you simply lose your turn. It is also possible to make 4 a house rule with options such as giving a coin to the board's owner, fill every space on the board, or pay a coin to the host.
